Professor Beata Walczak
Editor
Chemometrics and Intelligent Laboratory Systems

Dear Professor Walczak,

It is our opportunity to refine our research paper with constructive comments we received from the reviewer on our manuscript entitled "A tool for simulating multi-response linear model data" (Ref: CHEMOLAB_2017_377). As per the comments we have added an additional example which has helped to increase the richness of the paper. The comments on the revision is attached in a separate document.

Sincerely,

Raju Rimal
